SHOP FLOOR CONTROL

Today's price-sensitive and time-compressed global business environment is more competitive than ever. Brand and contract manufacturers of everything from fashion apparel to industrial sewn products face constant pressure to reduce costs, improve quality and speed deliveries. With little room for errors and delays, they must constantly stay on top of the status of each order, individual and team productivity, and any off-standard events can make the difference between on-time delivery and chargebacks; profit and loss.

By removing traditional infrastructure requirements and adopting Internet of Things (IoT) technologies for the factory floor, Exenta® SFC puts real-time plant floor management within the reach of a broader range of manufacturers than ever before.

KEY ADVANTAGES:

- × Increase Productivity & Efficiency
- × Reduce Throughput Time
- × Improve Visibility and Control
- × Manage Costs and Quality
- × Reduce Absenteeism
- × Minimize Off-Standard Time

This real-time manufacturing solution leverages an innovative Android™ app, management dashboard, and off-the-shelf tablets running on Wi-Fi networking to collect production data and empower workers, supervisors and managers with up to the minute production visibility and control. Exenta SFC changes the game by eliminating the traditional requirements for proprietary hardware, wired network infrastructure and complex software tools.

Exenta SFC simplifies the deployment, use and maintenance of shop floor control while delivering all the many proven benefits of shop floor control to drive a record-fast return on investment.

Shopfloor EXENTA

THE SIMPLEST PATH FROM CONCEPT TO CONSUMER

Real-Time Data Collection

- ✕ Standard Android Devices
- ✕ Wireless Networking
- ✕ Web-Based Management Dashboard

Time/Attendance/Payroll

- ✕ Calculate Source to Gross Payroll
- ✕ Export to 3rd Party Payroll Service
- ✕ Supports Individual and Team Incentives
