# PLM REVO™

As consumers demand ever faster and more innovative products, fashion and soft goods brands and retailers are challenged to evolve with the times. To remain relevant in these fast-paced and competitive markets, companies need to find better ways to grow revenue while reducing costs. With no time to waste on complex and cumbersome systems, it's time to take a fresh look at PLM.

Representing a revolution in PLM, Exenta PLM REVO has the power to turbocharge your product lifecycle. Taking the user experience to a whole new level, it eliminates much of the tedious data entry to keep designers creative and automates time-consuming processes to speed products to market and simplify global collaboration.

## Key Advantages

- *Grow Revenue while Reducing Costs*
- *Accelerate Design, Development & Sourcing*
- *Enhance Design Creativity & Productivity*
- *Streamline/Automate Frontend Processes*
- *Foster Team & Supply Chain Collaboration*
- *Boost Calendar/Process Visibility & Control*

The web-based/cloud/mobile solution streamlines approvals, change management, line selection, vendor quotes and bids, compliance and other global processes. Real-time information and analytics keep everyone working on the same page and support better-informed and more timely business decisions. Flexible features adapt to your workflows and allow you to define the milestones and steps important to your process. Client-based labeling allows you to name things in a way that makes sense for your business. Most importantly, PLM REVO's easy-to-use interface means minimal training is required, and your team will be up to speed in a matter of weeks, enjoying the efficiencies the system delivers.

The companion **Exenta PLM REVO** Design Plug-in for Adobe® Illustrator® enables designers to launch new concepts, contribute to and use information from PLM without ever leaving their design software. You can give your designers access to the latest pallets, colors, components and templates within the PLM system, simplifying the design of new items.

## Key Features
