Today's price-sensitive and timecompressed global business environment is more competitive than ever. Brand and contract manufacturers of everything from fashion apparel to industrial sewn products face constant pressure to reduce costs, improve quality and speed deliveries. With little room for errors and delays, they must constantly stay on top of the status of each order, individual and team productivity, and any off-standard events can make the difference between on-time delivery and chargebacks; profit and loss.

By removing traditional infrastructure requirements and adopting Internet of Things (IoT) technologies for the factory floor, Exenta Shopfloor puts real-time plant floor management within the reach of a broader range of manufacturers than ever before.

  (based on real clients and real results)
- **Reduce maintenance costs by up to 50%**
- **Reduce machine downtime by up to 40%**
- **Increase forecasting accuracy by 85%**

"Exenta is helping us be faster and more accurate with everything we're doing right now. The instant feedback motivates workers to achieve higher performance levels."

– PROPPER INTERNATIONAL

"Exenta Shopfloor REVO is amazing! The interface is so clean and clear that it is easy to implement and adopt. Even the less tech savvy operators have embraced it easily and enjoy using it, which has translated into higher job satisfaction and a 10% increase in productivity in the first month alone. We also had a significant return on undocumented reduction in administrative time. Previously, we were manually tracking our inventory and entering incentive pay, now that is all done automatically."

– GRAND FOREST
