EXENTA
From Aptean

**Exenta ERP, an Aptean Fashion
Software Solution**

Digitalize Your
Supply Chain

Simplify supply chain processes with a modern
ERP solution.

To stay ahead in the fashion apparel industry, it is essential to have an integrated digital supply chain.
Exenta ERP, an industry-focused enterprise solution, manages your entire business and supply chain by
spanning traditional software categories. This modern ERP system supports your apparel business by
making it easy to manage business processes and provides easy access to real-time data across the
supply chain.

Benefits of Exenta ERP

❯ Increase operational efficiency

❯ Effectively manage inventory levels

❯ Increase inventory accuracy

❯ Improve visibility and service

❯ Reduce chargebacks

❯ Master omnichannel fulfillment

Time Phased Availability

Exenta ERP provides real-time data on one easy to use, cloud-based platform.

"We needed a scalable solution with out of the box functionality that could accommodate our current and future needs. We demoed a long list of competing ERP systems. Exenta's broad and deep functionality set, along with its superior technology platform stood out from the competition. Exenta was an easy choice."

Jeremy Husk, CFO, Koi Design

"Using an apparel related ERP is key for any apparel or soft goods manufacturing entity, because we have unique operational and administrative needs. First and foremost, Exenta's grid system is very user-friendly for apparel manufacturing, and that's been essential to improving order accuracy and saving time."

Carrie Bovender, CEO and Owner, Grand Forest

  » Adobe Illustrator Plug-in

  » Data Import Suite

  » Mobile-First Design

❯ Financial Management

  » Optimize Management

  » Reporting Streamline Receivable & Payables

  » Ensure Accounting Standards Compliance

Automate Critical Processes with an Industry-focused ERP Solution

In today's competitive and fast-paced business environment, fashion and consumer product companies must quickly respond to shifting consumer preferences and marketplace demands. Traditionally defined seasonal calendars are being replaced by continuous development cycles that deliver greater and more frequent product innovation. Owned and operated production has given way to complex global supply chain operations. Order management and fulfillment is far more demanding in the era of omnichannel retailing.

To address these new realities and build sustainable success, retailers, brands, and manufacturers know that they must leverage the latest information technology to streamline processes and manage costs. Unfortunately, far too many companies are failing to realize the full potential of their technology investments due to the fact that much of the industry's software is still based on code written circa 1980.

By integrating processes and information, this end-to-end solution empowers apparel, footwear, accessory and related businesses with more responsive internal and supply chain operations, better informed decision-making and higher levels of collaboration and customer satisfaction that drive increased sales and margins.

In contrast to existing ERP and best-of-breed software that requires complex customization and integration, Exenta is an industry-focused enterprise solution that manages the entire business and supply chain by spanning traditional software categories.
